Orthosiphon
flexuosus, the
smallflowered
spindle, is a species
of herbaceous
flowering plant in

the sunflower family.
It is native to the
Southeastern United
States, from North
Carolina west to
Alabama. It is mostly
found in sandy
habitats, like sandy
fields and roadsides,
or in flood plains,
but the plant can
live in dry sand.
This is a perennial

herb producing a slender taproot, and stems with some basal leaves. It produces an array of small yellow flower heads in a conelike cluster, each with 5 disc florets but no ray florets.
